SECTION 1: EXECUTIVE SUMMARY & CORPORATE FOUNDATIONS

1.1 Executive Statement

Octane Transport Zambia Limited is a privately owned Zambian transportation, logistics and general supply company headquartered in Ndola, in the Copperbelt Province. The company moves cargo and equipment for corporate, industrial and mining-sector clients across Zambia and the wider SADC region, consolidating supply, logistics and haulage capability under a single accountable operator.

> ***Positioning Statement:*** *Octane Transport exists to give corporate, industrial and mining-sector clients one dependable partner for the movement and supply of goods — reducing vendor complexity while protecting delivery timelines, cargo integrity and compliance standing.*

Operating from Zambia's principal mining and industrial corridor, the company is structurally positioned to serve the material, equipment and freight requirements of the Copperbelt's mining, engineering and heavy-industry base, while maintaining an established transport network reaching customers throughout the SADC region.

1.2 Corporate Identity

Purpose, Direction & Values. Octane Transport’s published purpose, direction and values describe its commitment to dependable transportation, logistics and supply services, compliance-minded operations and long-term client relationships.

PILLAR	STATEMENT
Purpose	To provide dependable transportation, logistics and supply solutions that get clients' goods to their destination safely and on time, throughout Zambia and the SADC region.
Direction	To keep building operating capacity and regional reach, backed by a qualified, experienced team, in order to support a growing base of corporate, industrial and mining-sector clients.
Values	Reliability and on-time delivery · Compliance-minded operations · Long-term client relationships

> ***Operational Philosophy:*** *Octane Transport pursues long-term relationship building over transactional engagements — prioritizing clear communication, compliant paperwork and insurance protocols, real-time cargo visibility, and treating every consignment as a priority, whether the client is a wholesaler, contractor, industrial supplier or mining-sector operator.*

1.3 Company Overview & Background

ATTRIBUTE	DETAIL
Legal / Trading Name	Octane Transport Zambia Limited
Ownership Structure	Privately owned Zambian company
Headquarters	19 Kafironda Drive, Itawa, Ndola, Zambia
Regional Base	Copperbelt Province — Zambia's principal mining and industrial region
Operating Territory	Zambia and the wider SADC (Southern African Development Community) region
Core Business	Transportation, logistics and general supply solutions
Client Base	Corporate, industrial, mining-sector, agribusiness, engineering and logistics-sector clients

Octane Transport operates with substantial operating capacity, powered by a team of qualified staff with considerable experience in the transport and logistics industry. The company transports equipment and supplies throughout Zambia and the SADC region, with an operating model built around ensuring that client goods arrive safely and on time at their destination.

Procurement Note: *Formal incorporation details, statutory registration and licensing documentation are available on request through Octane Transport's office as part of vendor registration or tender due diligence (see Section 3.2).*

SECTION 2: OPERATIONAL CAPABILITIES & INFRASTRUCTURE

2.1 Core Services Breakdown

Octane Transport delivers a full-service capability spanning general supply, logistics, cargo transportation, shipment visibility and road transportation — engineered to reduce the number of vendors a client's procurement function needs to manage.

#	SERVICE LINE	SCOPE OF WORK	COMMERCIAL VALUE
01	**General Supply**	Supply of building and construction materials, mining and industrial equipment, general office and hospital consumables, civil works, engineering fabrication and PPE attire.	A single, accountable supplier for materials, equipment and safety attire — reducing vendor-management overhead.
02	**Logistics**	End-to-end consignment management: documentation, paperwork processing and compliant insurance protocols, planned and confirmed ahead of every movement.	Proactive documentation and insurance compliance lowers risk and delay at every handover point.
03	**Cargo Transportation**	Cargo transportation throughout Zambia and the SADC region for wholesalers, growers in the produce industry, and engineering-sector clients, run on a well-serviced truck fleet.	A maintained fleet and regional route experience translates into fewer breakdowns and missed deadlines.
04	**Real-Time Cargo Tracking**	A tracking system giving clients exact shipment location data and immediate notification of any delays.	Full shipment visibility lets client operations and procurement teams plan with confidence.

05	**Road Transportation**	Movement of farm equipment and general supplies nationwide, from one side of the country to the other.	Flexible, nationwide road transport capability for equipment and general supplies.

Service Workflow — Enquiry to Delivery

ENQUIRY & SCOPING	PLANNING & DOCUMENTATION	TRANSPORT & TRACKING	DELIVERY & FOLLOW-UP
Cargo, route and timeline captured	Paperwork prepared, insurance protocols confirmed pre-movement	Cargo moves on Octane's fleet with real-time tracking	Goods arrive safely and on time; team remains the ongoing point of contact

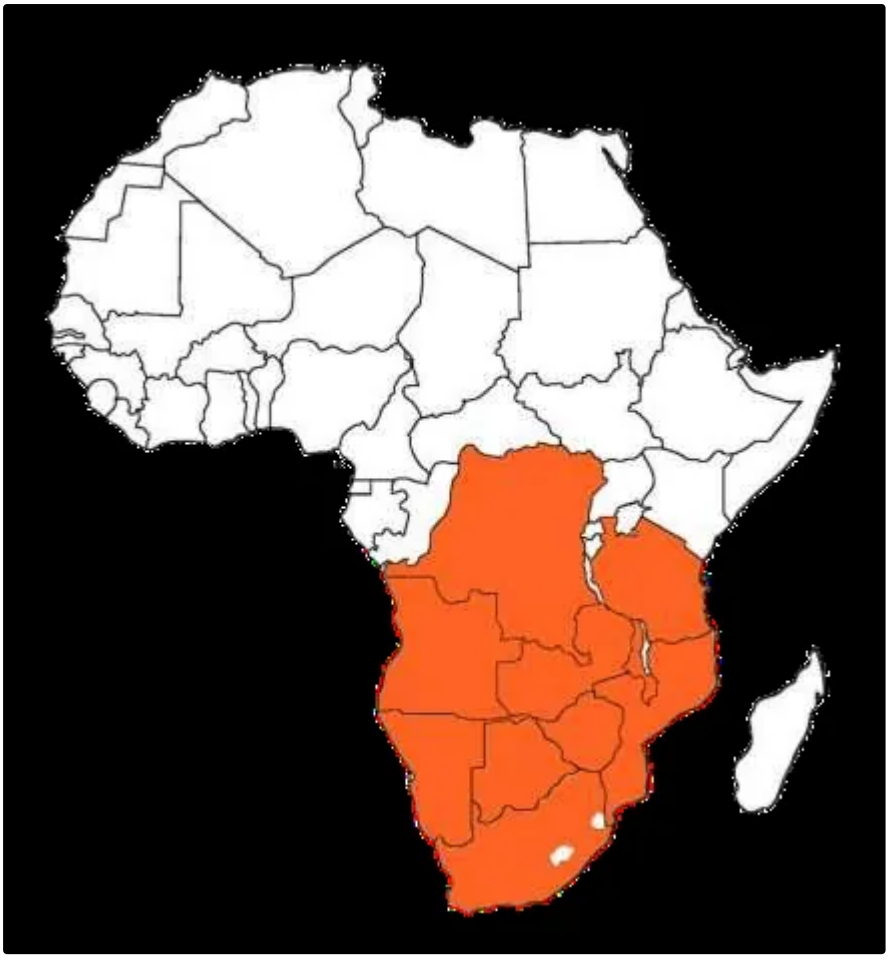

2.2 Asset & Fleet Operations

> ***Procurement Note:*** *In line with Octane Transport's commitment to accuracy, fleet capability is described below by category rather than by specific unit counts or vehicle models. A detailed fleet register — vehicle types, capacities and unit numbers — is available on request as part of vendor registration or tender due diligence.*

FLEET CATEGORY	FUNCTION	MAINTENANCE STANDARD
Cargo Trucks & Trailers	Configured for general and bulk cargo movement; used for produce, engineering and industrial consignments across Zambia and the SADC region.	Maintained on a scheduled service programme designed to minimize breakdowns and protect delivery schedules.
General Supply & Equipment Sourcing	Sourcing and delivery of building and construction materials, mining and industrial equipment, PPE attire and consumables — backed by in-house civil works and engineering fabrication capability.	Managed through the General Supply service line, independent of the transport fleet.
Tracking & Logistics Technology	Real-time cargo tracking infrastructure providing location visibility and early delay notification across every shipment.	Supported by the logistics team, which manages documentation and insurance compliance ahead of each movement.

A detailed fleet schedule, including vehicle types and load capacities, is available on request to support supplier registration, procurement due diligence and tender requirements. Vehicle registration information is shared following a review of the request.

2.3 Operational Footprint & Technology Integration

Octane Transport's operational footprint is anchored in Ndola, Copperbelt Province, with an established road transport network extending across Zambia and into the broader SADC region — connecting suppliers, industrial sites and clients across national borders.

FOOTPRINT ELEMENT	DETAIL
Home Base	Ndola, Copperbelt Province, Zambia
Primary Operating Territory	Zambia (nationwide)
Extended Network	SADC region, via an established cross-border road transport network
Technology Backbone	Real-time cargo tracking system covering location data and delay alerts
Compliance Infrastructure	Documentation and insurance-protocol management integrated into every consignment

Selected Industries Served

INDUSTRY	ENGAGEMENT
 **Agribusiness**	Road transportation and cargo services for farm equipment, produce and agricultural supplies, connecting wholesalers and growers with their markets on time.
 **Mining**	Transport and supply support for the mining sector, including the movement of machinery, equipment, spare parts and general supplies. Contact us to discuss your load, route and delivery requirements. Current fleet and compliance documentation is available on request. *Photo: "One truck again" by Phil Scoville, flickr.com/photos/97803271@N00/3622997168 Licensed under CC BY 2.0 (creativecommons.org/licenses/by/2.0). Cropped. Illustrative only.*
 **Engineering**	Cargo transportation, civil works, engineering fabrication and general supply for engineering-sector clients and construction sites.
 **Food & Beverage**	Reliable, trackable cargo transportation that keeps production and distribution schedules on time.

INDUSTRY	ENGAGEMENT
 **Plastics & Packaging**	Cargo transportation and general supply support for materials and finished-goods movement.
 **General Logistics**	End-to-end logistics support — documentation, insurance compliance, cargo transportation and real-time tracking — for logistics partners across the region.

Copperbelt Positioning: *Headquartered at the heart of Zambia's mining region, Octane Transport is structurally positioned to support mining, engineering and heavy-industry clients through its General Supply and Cargo Transportation service lines, with an existing client base already operating in the logistics and petroleum sectors.*

SECTION 3: CORPORATE GOVERNANCE, RISK & COMPLIANCE

3.1 Leadership Structure & Key Management

Octane Transport is a privately owned and privately managed company. Day-to-day client and corporate correspondence is coordinated through the company's principal contact channel:

CONTACT	ROLE	DETAILS
Abdihakim Mohamed	Principal Corporate Contact	abdihakim.mohamed@octanetransport.com
General Enquiries	Client Service Desk	info@octanetransport.com · +260 973 821 013 WhatsApp +260 965 732 525

A full leadership biography set and organizational chart are not published externally at this time and are available on request during formal partnership, vendor or investor due diligence.

3.2 Regulatory Compliance, Legal Framework & Documentation

Octane Transport manages documentation and compliant insurance protocols as a standard part of its Logistics service line. For formal vendor registration, tender or institutional due diligence, the following documentation categories are maintained and can be made available on application:

DOCUMENT CATEGORY	STATUS
Certificate of Incorporation / Company Registration	Available on request
Tax Registration (ZRA TPIN)	Available on request
NAPSA & Workers' Compensation Fund Registration	Available on request
Applicable Road Transport / Operating Licences	Available on request
Insurance Certificates	Available on request
HSE Policy & Safety Documentation	Available on request

> ***Governance Note:*** *Octane Transport does not currently publish formal HSE certifications (such as ISO 45001 or ISO 14001) externally. Current HSE policy documentation, safety records and compliance certificates are released to authorized clients, procurement teams and prospective*

partners upon a reviewed request, in view of the confidential and sensitive nature of certain records.

3.3 Risk Management & Quality Assurance Protocols

CONTROL AREA	PRACTICE
Insurance & Documentation	Every consignment is planned with paperwork and compliant insurance protocols considered ahead of movement.
Shipment Monitoring	Real-time cargo tracking supports proactive awareness of delays, enabling on-road risk and schedule impacts to be managed as they arise.
Fleet Integrity	A scheduled maintenance programme reduces the operational and safety risk associated with poorly maintained vehicles.
Personnel Standards	A team of highly qualified staff with considerable industry experience underpins safer, more predictable operations.
PPE & Safety Supply	The General Supply service line includes PPE attire, extending a safety-conscious standard to the clients Octane equips.
Route & Environmental Planning	A well-maintained fleet and planned routing reduce unnecessary breakdowns and detours — a practical control on both cost and environmental impact.

SECTION 4: STRATEGIC GROWTH & COMMERCIAL ENGAGEMENT

4.1 Competitive Advantages & Value Proposition

ADVANTAGE	WHY IT MATTERS TO CLIENTS
Established Zambian Operator	Privately owned, headquartered in Ndola with local knowledge of Zambian and regional routes.
Regional Reach	Cargo transportation throughout Zambia and the wider SADC region on an established transport network.
Full-Service Capability	General supply, logistics, cargo transportation, real-time tracking and road transportation under one accountable vendor.
Experienced, Qualified Team	Highly qualified staff with considerable experience in the transport and logistics industry.
Real-Time Cargo Visibility	Exact shipment location data and early delay awareness for confident operations planning.
Compliance-Minded Logistics	Paperwork and compliant insurance protocols managed proactively ahead of every consignment.
Trusted Client Base	Working relationships with logistics and petroleum-sector clients, including those referenced in Section 4.2.
Long-Term Partnership Approach	A relationship-building model aimed at lasting business partnerships rather than one-off transactions.

4.2 Client Portfolio

Some of the clients Octane Transport has worked with include, but are not limited to:

CLIENT	RELATIONSHIP
Reload Logistics	Logistics Partner
Impala Terminals	Logistics Partner
Hass Petroleum	Logistics / Petroleum-Sector Partner
Polytra Zambia	Logistics Partner
World Co. Logistics	Logistics Partner
Logistra Africa	Logistics Partner

4.3 Strategic Growth Roadmap & Expansion Vision

Octane Transport's stated strategic direction is to keep building operating capacity and regional reach, backed by a qualified, experienced team, in order to support a growing base of corporate, industrial and mining-sector clients across Zambia and the SADC region. This translates into three ongoing priorities:

1. **Capacity Growth** — expanding fleet and supply capability to serve a larger volume of corporate, industrial and mining-sector consignments.
2. **Regional Depth** — deepening the existing SADC transport network to support cross-border client operations.
3. **Partnership Retention** — reinforcing the long-term relationship model that already underpins the company's logistics and petroleum-sector client base.

> ***For Procurement & Supply-Chain Teams:*** *Engaging Octane Transport consolidates general supply, logistics, cargo transportation and shipment tracking into a single vendor relationship — meaning fewer suppliers to manage, clearer documentation, visible cargo status, and a team invested in the relationship beyond a single shipment.*

4.4 Engagement Process

STEP	DESCRIPTION
1. Initial Enquiry	Share the requirement — cargo type, route, volume and timeline — via the contact form, phone or email.
2. Scoping & Documentation	Octane confirms scope, paperwork and compliant insurance protocols, and shares relevant compliance documentation.
3. Proposal & Agreement	A tailored quote is provided and terms are agreed, whether for a one-off consignment or an ongoing account.
4. Onboarding & Delivery	Cargo moves on Octane's fleet with real-time tracking; the team remains the client's point of contact for future needs.

4.5 Call to Action

> ***Ready to Build a Long-Term Partnership?*** *Whether you require a transportation quote, wish to register Octane Transport as a vendor, or need corporate, statutory, insurance or HSE documentation for procurement due diligence — our team is ready to respond.*
